

Optional module

LOGO RECOGNITION

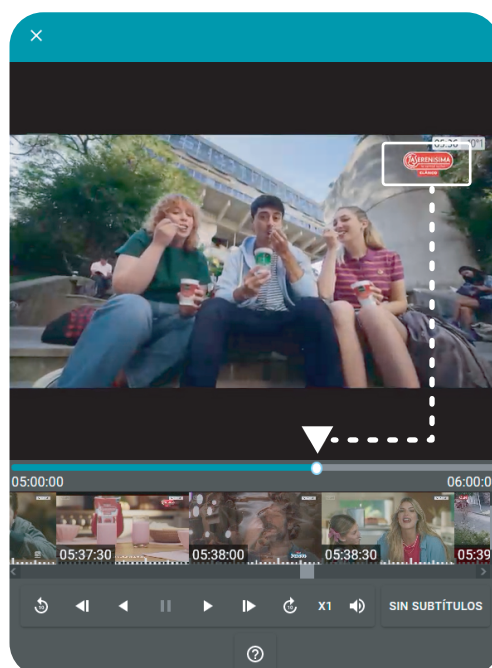

Automatic recognition of logos

The logo recognition module allows automatic detection of logo in the different television signals and/or streamings that we are receiving.

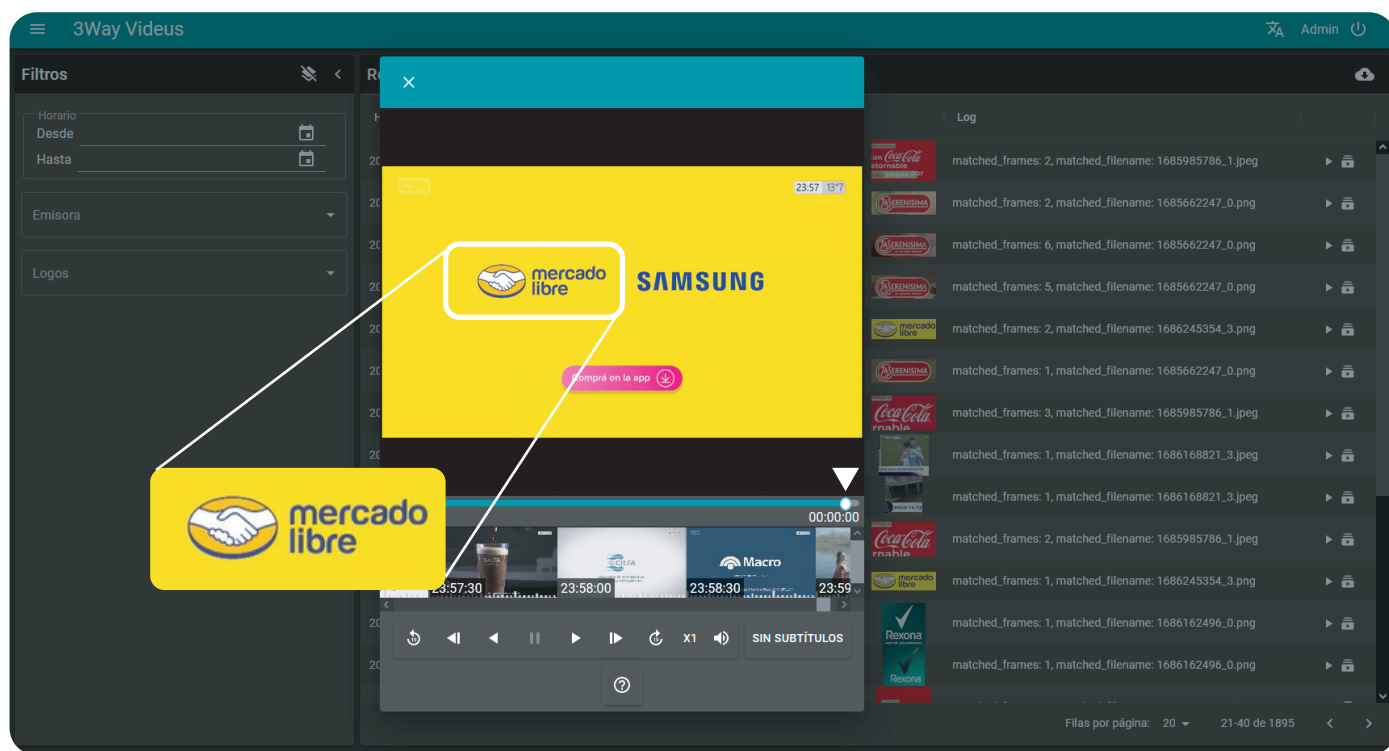

The system allows people to be registered by uploading multiple images to be recognized in the different signals. It allows searching, as well as exporting reports and generating alerts.

From the recognition that is generated of the people in the channels of the selected signals, the logo recognition tool generates a report with the possibility of previewing the appearance. It can be exported in CSV or XLS format.

Our logo recognition module has an intuitive and user-friendly interface for easy use and management of the tool.

HIGH EFFECTIVENESS

The system is 99% effective in logo recognition

AUTOMATIC SEARCHES

Through the images uploaded by the user, the system recognizes logos automatically

100% WEB OPERATION

The configuration and operation is 100% web, HTML5. No plugins required. Compatible with all standard browsers on the market

EXPORT OF REPORTS

Reports can be extracted in different formats such as XLS, CSV

APPLICABLE TO DIGITAL / ANALOG TV

Works on analog and digital TV signals

REST API FOR ADMINISTRATION AND OPERATION

It has API http for massive loads of material, and reports by webhook before the recognition of a logo

3Way Solutions is a company dedicated to developing products and solutions for the broadcasting, cable, professional video and government sectors focused on television recording, content detection, media monitoring, legal copying, content repurposing, regulatory compliance verification and QoS/QoE monitoring.
