

VIDEUS

ROUND ROBIN

MONITORING SYSTEM BY AUTOMATIC SWEEP OF SIGNALS.

SYSTEM TO MONITOR MULTIPLE SIGNALS AT LOW COST.

Designed specifically for cable operators.

It is a system designed specifically for the cable operator that needs to monitor multiple signals at low cost. The system scans analog signals (PAL or NTSC), as well as digital signals (automatically tuning by sending IR commands to the Set Top Box).

*Automate monitoring of the
whole grid and access
remotely from your
smartphone!*

SUPPORTED INPUT FORMATS

- Analog RF.
- Video Base Band, NTSC, PAL.
- HDMI.

MONITORING SCREEN OF ALL SIGNALS WITH THEIR RESPECTIVE ALARMS.

Always stay on top of signal status before your customers can see a failure.

FUNCTIONALITIES

- 100% remote operation from web interface with preview.
- Live or archive video display on local or remote screen.
- Set Top Box remote control automatically through IR Controls.
- Monitoring of analog and digital signals 24/7, 365 days a year.
- Grid monitoring agenda configurable to the needs of each client.
- audible alarms.
- Fully configurable alarm report by e-mail.

AUTOMATIC CHANNEL SCANNING

The system automatically sweeps across the signals on the program schedule

EMAIL AND SOUND ALARMS

Receive error report alarms on your email or get a sound alarm when a fault occurs

LOCAL AND WEB OPERATION

Configuration and operation is 100% Web (HTML5). It does not require any plugins. Compatible with all standard browsers in the market

MONITOR MORE THAN 750 CHANNELS

Monitor over more than 750 TV channels on 2 inputs

ANALOG AND DIGITAL INPUT

The system includes a RF input for the analog channels and a HDMI input to receive data from an IR controlled SET TOP BOX

VIDEO VISUALIZATION

Watch the live video or the video of the recorded channel sequence

HDMI MONITORING OUTPUT

Watch live on display the scanning and alarms on a Multiviewer configuration

AUDIO/VIDEO SEQUENCE RECORDING

Generate a copy of the recording of the channel change sequence to be able to verify the errors in the future

“

**Full Uptime!
System prepared to work
24x7 without interruptions.**

TECHNICAL FEATURES

- CentOS 7 64-bit operating system.
- Mysql database.
- Firewall.
- HTTP/HTTPs support.
- XFS or EXT4 storage file system.
- Web administration and operation.
- It does not require installing plugins.
- Date/Time Synchronization with NTP or Nettime
- Integration with LDAP (Active Directory).
- Shape software update system
- remote.
- Full Uptime! System ready to go
- 24/7 without interruptions.

SECURITY

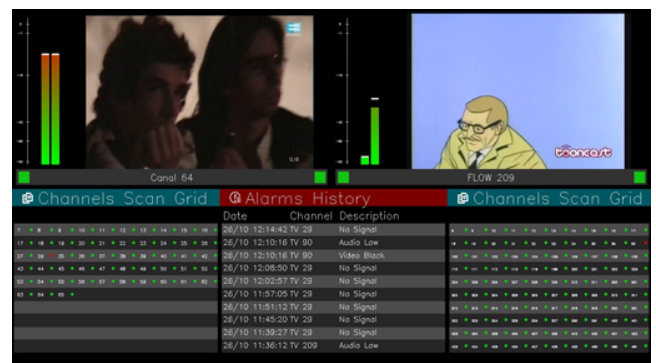

RRobust user, group and permission management system.

Permissions by functionality and by content

Access through username and password

Groups allow you to create different user profiles to navigate the system.

The system keeps a record of each user's activity, with date/time, ip, etc.

3Way Solutions is a company dedicated to developing products and solutions for the broadcasting, cable, professional video and government sectors focused on television recording, content detection, media monitoring, legal copying, content repurposing, regulatory compliance verification and QoS/QoE monitoring.
