

CLIPPING

RADIO & TV RECORDING SOFTWARE WITH CLIP CREATION

Customizable buttons to post on social media

The new software update contains customizable buttons to be able to post on social media with just one click.

You Can Now Create Automatic Clips with the Help of Artificial Intelligence

Simple, fast & dynamic

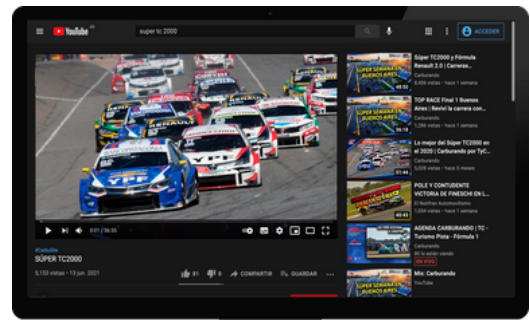

3Way offers a complete clipping tool for TV and Radio recording, segments extract and clip creation. The system is used to record multiple signals in different formats. It allows a simple operator the possibility to create segments, join them, add blur, logos and automatically publish in social networks. Does not require NLE, nor advanced knowledge for the use of the system.

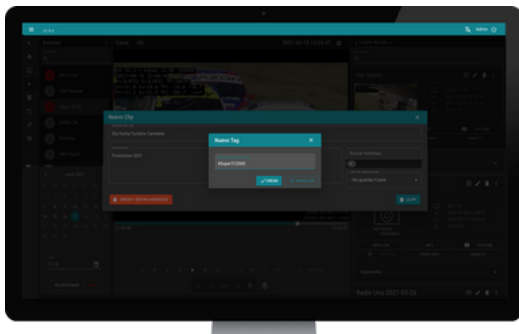

CREATING CLIPS IN 4 EASY STEPS

1. Search broadcasting station, date and time.

2. Watch video and set IN and OUT.

3. Put text information and select destination.

4. Ready! It's online.
